

LUCKEEPLUGPERFORM

Quick Start Guide

Version 1.0 / RC1.1 - macOS and iPadOS

Get from install to performance fast. LuckeePlugPERFORM is a live DJ/performance environment built around a touch turntable, waveform, 16-pad performance surface, four-stem control, cue/roll controls, FX, MIDI mapping and set recall.

1. Install and Launch

macOS direct download

1. Open the notarized LuckeePlugPERFORM DMG.
2. Drag LuckeePlugPERFORM to Applications if prompted.
3. Launch normally. The direct build is Developer ID signed, Apple-notarized and stapled.

iPadOS

- Install the App Store release when available. The submitted App Store candidate is version 1.0.0, Build 3.
- Grant Files access when prompted.

2. Load a Track

4. Press LOAD SONG.
5. Choose an audio file with the system file picker.
6. Confirm the waveform and BPM information populate.

3. Split and Perform Stems

7. Press STEM SPLIT.
8. Wait for local processing to finish.
9. Confirm VOCALS, DRUMS, BASS and OTHER are ready.
10. Enable STEM MODE and use the four stem pads to mute/unmute stems live.

4. Core Controls

CONTROL	QUICK USE
Turntable / Platter	Touch/drag for scratch-style forward/reverse movement, holds and backspins.
FX 1-4	Filter/Isolator, Reverb, Vinyl Brake and Delay.
Pads 5-8	Stem controls in STEM MODE.
Pads 9-12	Chorus Swell, Comp Pulse, Roll and Loop.
Pads 13-16	Cue Point 1-4.
MODE ROLL / ROLL	Select roll behavior and rhythmic division.
LOOP / CLEAR LOOP	Create and clear loop playback.
MASTER	Overall output level.

5. Save and Recall

- SAVE SET stores the current set; LOAD SET recalls it.
- MIDI LEARN maps supported controls; MIDI SAVE / MIDI LOAD preserve mappings.
- CUE BANK and scene controls move between performance assignments.

6. Privacy / Support

- PRIVACY opens the LuckeePlug Family Privacy Policy.
- <https://luckeelefty.com/luckeeplug-privacy-policy>
- Support: <https://luckeelefty.com>

Known RC1 Note

Skin Wrap image replacement is deferred/non-blocking in RC1. A newly selected skin may not immediately refresh. Audio, stem, scratch, MIDI, cue, loop and FX operation are unaffected.
